EDUCATION

Emory Rollins School of Public Health – Atlanta, GA, USA 09/2024 - 06/2026
Master in Public Health, Certificate in Data Science: Health Policy and Health Management **(Policy Track)**

- A broad set of practical skills and understanding suitable for success in economy evaluation and policy analysts in healthcare
- Relevant coursework: Economic Evaluation in Healthcare, Constructing and Interpreting Economic Models in Healthcare, Health Economics, Public Financing, Policy Analysis, Health Services Data Analytics, Qualitative/Quantitative Methods for Public Health Research
- Completed the Data Science Certificate with advanced data-science tools in public health analytics

University of Toronto, St. George Campus – Toronto, ON, CA
Bachelor of Science: Specialty in Immunology 09/2019 - 06/2023

- Dean's List Scholar (Winter 2020)
- Relevant coursework: Calculus, Stats for Life Science, Immunity and Infection, Confront Global Challenge, Biochemistry Lab, Immunology Research Method, Immunity in Action, Clinical Immunity, Immunotherapy

ACADEMIC EXPERIENCES

Support Networks and Problem Solving Among Older Adults Experiencing Self-Neglect
Supervisor: Jane Lowers, PhD, MPA, Emory School of Medicine 05/2025 –

- Characterize self-directed goals and social supports identified by older adults living alone who experience self-neglect
- Compare characteristics of elder abuse among older adults with and without close family
- Perform both quantitative and qualitative analysis in public health with complex data manipulation
- **Normalize over 10k rows, 50+ columns unorganized raw data into deidentified tables, slides and 15+ visualizations**

Natural Language Processing to Identify Adults Aging Solo Using EMR Data
Supervisor: Jane Lowers, PhD, MPA, Emory School of Medicine 09/2025 –

- Perform EMR chart review and extracted key linguistic indicators of living situation and social-support patterns to inform lexicon development
- Ensure data integrity and documentation for downstream quantitative analysis and model validation

Investigation on Molecular Dynamics (MD) of Pin1 Protein
Supervisor: Zhi Zeng PhD, UoT Department of Biochemistry 11/2021 - 12/2021

- The project aimed to use MD simulations (GROningen Machine for Chemical Simulations, GROMAC) under Linux to investigate the molecular dynamics of the WW domain of human Pin1 protein
- Stimulated the conformation of several variants of WW Domain (fold/unfold) under different conditions
- Learned operation under Linux system and relative coding
- Wrote an individual report illustrating the folding and unfolding strategies of the human Pin1 WW domain and its relative kinetics by trajectory comparisons; received an A+ for this report

Investigation on Methanol Oxidase (MOX) Purification, Spectral and Substrate Analysis
Supervisor: Alex W. Ensminger, Associate Professor, UoT Department of Biochemistry 10/2021 - 11/2021

- The project aimed to purify MOX from samples and used for further spectral and substrate analysis
- Performed lab procedures according to the lab protocol (Methodology: Gel Filtration Column of MOX resuspension, MOX activity assay, BioRad assay, SDS-PAGE Gel assay)
- Communicated with professor and TA for report writing and data calculation
- Organized research team in both lab performing and report writing, illustrating the substrate specificity of different organic compounds to MOX protein through calculation and graphing by EXCEL

PROFESSIONAL EXPERIENCES

Emory University – Atlanta, US
Teaching Assistant, *Department of Quantitative Theory and Methods* 08/2025 –

- Served as a Teaching Assistant for QTM 150: Introduction to Statistical Computing I, an undergraduate course focused on foundational R programming and applied data analysis skills.
- Assisted in teaching R programming fundamentals including data types, control flow (loops and conditionals), and functions
- Provided in-class support by answering student questions and clarifying course concepts during lectures and labs
- Helped students develop data analysis skills using R through hands-on assistance and one-on-one mentoring
- Promoted an inclusive and productive classroom environment by actively engaging with students and responding to diverse learning needs

IQVIA China – Shanghai, CN
Full-time Internship, *Center of Clinical Operation Excellence* 09/2023 – 03/2024

- Assisted to the preparation of on-site GCP (Good clinical practice) inspection of clinical trials conducted by China Food and Drug Administration (CFDA).
- Coordinated with CRAs (quality manager and quality specialists) in summarizing inspection reports and planning clinical trial monitoring visits.
- Performed presentation to deliver latest news, trends, and updates in clinical trials in China.
- Other administrative and support works that facilitated the works of CRAs.

Shanghai Institute of Immunology - Shanghai, CN
Research Assistant (Supervisor: Bin Li), Research Group on alleviate allergic airway inflammation 07/2022 - 08/2022

- Assisted to investigate the effect of histone acetyltransferase KAT8 and acetylation on IL-33 and on asthma
- Performed histone pull-down assay to examine the specific role of KAT8 and its effect to IL-33
- Assisted in lab, learned and practiced basic lab techniques (PCR, mouse injection, etc.)
- Participated in academic discussion and assisted in presenting research paper on autoimmunity

CAS Center for Excellence in Molecular Plant Sciences │Institute of Plant Physiology and Ecology - Shanghai, CN
Research Assistant (Supervisor: Chengshu Wang), Research Group on insect-pathogenic fungus 06/2022 - 07/2022

- Assisted in the investigation of the biosynthetic regulation and chemical ecology of 2-pyridones in Beauveria bassiana
- Participated in the fungal strains coculturing and maintenance
- Performed gene expression analysis and verifications by qRT-PCR
- Assisted in lab, learned and practiced basic lab techniques (southern blot, plasmid cloning and transfection, etc.)
- Joined in the research group meeting and presented research papers

SKILLS

- Chinese (native); English (Advanced)
- Skillful in MS Office Suit
- Data analysis and visualization using R, Python, SAS, and SQL
- Strong background on immunology
- Skilled in developing cost-effectiveness models, decision trees, and sensitivity diagrams.
- Effective Analyzing and researching journals and paper
- Excellent oral presentation skills in English and Chinese
- Effective communication, planning and coordination
- Experienced practice of basic statistical analysis
- Plentiful team works experiences

EXTRACURRICULAR

Immunology Students' Association, UoT, Ontario, CA
Member 09/2019 – 06/2023

- Participate in virtual academic meeting with graduate immunology students
- Announce peers with upcoming academic events or activities such as welcome-back lunch with faculties
- Communicate with professors and peers during academic events on latest research result
- Improved time-management and organizational skills
